Brainstorming (Incomplete)

In the future, nobody will buy printed newspapers or books because they will be able to read everything they want online without paying. To what extent do you agree or disagree with this statement?

Agree

Publishers make money via ads: now: printed books/newspapers becoming expensive > becoming unpopular > lower sales and income for publishers > future: publish online > BECAUSE easy to steal content online > switch to ad income and offer everything for free

Online more accessible: now: most people work full time > at least 5pm > they are tired and no time to shop > prefer to get online BUT not everything available online > have to buy prints > FUTURE: when everything published online > stop reading paper altogether

Environmentally friendly: Now: increasing awareness about environment > future: everyone aware > more attention to environment > reduce tree cutting > stop buying paper books/newspapers

Introduction

Paraphrasing the task + Clear Opinion + hint to your first reason

It is said that/Some people believe that... + I strongly/generally believe/agree/disagree...
+ mainly for ...reasons/due to...issues/factors/...

Example: Cambridge IELTS 10, test 3

Countries are becoming more and more similar because people are able to buy the same products anywhere in the world.

Do you think this is a positive or negative development?

It is said that countries are becoming similar to each other because of the global spread of the same products, which are now available for purchase almost anywhere. I strongly believe that this modern development is largely detrimental to culture and traditions worldwide.
