

**CA:** read paper to protect their eyes

**Refute/Solution:** technological developments decrease effects of screen

Some people may argue that reading on paper ~~is~~will be better for protecting ~~their~~the eyes, but ~~i~~i think that technological developments will decrease the negative effects of screenss.

## Task:

In the future, nobody will buy printed newspapers or books because they will be able to read everything they want online without paying. To what extent do you agree or disagree with this statement?

## Introduction:

It is said that printed books and newspapers will not be bought by people in the future because everything will be available for free on the internet. I strongly agree with this view mainly due to financial issues.

## Main ideas:

Publishers make money via ads

Environmentally friendly

Online more accessible

In conclusion, I think that in the future, nobody will buy printed books or newspapers because everything will be available online for free. ~~I strongly believe this for two main reasons. First, publishers will be able to earn money through advertising, and second, people will be more environmentally friendly, which means they will buy digital content and reading online will be more accessible for them.~~

## Or:

In conclusion, I think that in the future, publishers will be able to earn money through advertising, people will be more environmentally friendly and reading online will be more accessible for them. Therefore, nobody will buy printed books or newspapers because everything will be available online for free.
