

# Introduction:

## Practice: Book 13 test 2

The chart below shows the percentage of households in owned and rented accommodation in England and Wales between 1918 and 2011.

Households owning and renting accommodation  
in England and Wales 1918 to 2011

1. The bar chart illustrates what proportion of households was-lived/were in owned and rented accommodation in England and Wales from 1918 and to 2011.
2. The diagram illustrates what proportion of households were/lived in owned and rented accommodation in England and Wales from 1918 to 2011.
3. The bar chart illustrates changes in the proportion of households [living] in owned and rented accommodation in England and Wales from 1918 to 2011.
4. The bar chat illustrates what proportion of households were in owned and rented accommodation in England and Wales from 1918 to 2011. ✓
5. The bar chart illustrates what changes in the proportion of households owning and renting their accommodation in England and Wales from 1918 to 2011.  
Or: The bar chart illustrates what proportion of households owned and rented their accommodation in England and Wales from 1918 to 2011.
6. The bar chart illustrates how the proportion of households in owned and rented accommodation in England and Wales changed from 1918 to 2011.
7. The bar graph illustrates what how the proportion of households in owned and rented accommodation was changed in England and Wales during a 93-year period from 1918 to 2011.

## Practice: Swiss birth & death rates (p.32)

The chart below gives information about birth and death rates in Switzerland from 1980 to 2030 according to United Nations statistics.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Write at least 150 words.

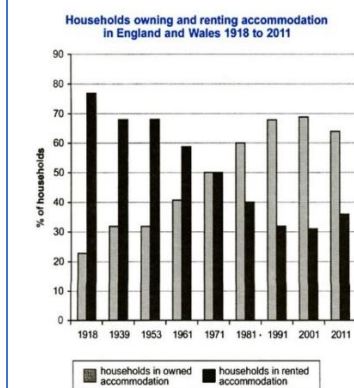

### Switzerland birth and death rates 1980-2030

1. The bar chart illustrates how the rates of birth and death changed in Switzerland between 1980 and 2020, with predictions s for 2030.
2. The diagram illustrates how many births and deaths were recorded in Switzerland ~~from~~ between 1980 ~~to~~ and 2020, with predictions for 2030.
3. The bar chart illustrates birth and death rates in Switzerland ~~since~~ from 1980 to 2020, with predictions until for 2030.
4. The bar chart illustrates how birth and death rates in Switzerland ~~have~~ changed ~~from~~ between 1980 ~~to~~ and 2020, with predictions for 2030.
5. The bar chart provides information about how birth and death rates in Switzerland changed between 1920 and 2020, with predictions until for 2030.
6. The bar chart illustrates how the ~~figures~~ rates of birth and death in Switzerland ~~have~~ changed ~~since~~ between 1980 and 2020, with predictions until for 2030.
7. The bar chart illustrates how ~~many~~ birth and death rates changed in Switzerland ~~from~~ between 1980 ~~to~~ and 2020, with predictions for 2030.
8. The ~~line~~ bar graph shows how the rates of birth and death changesd in Switzerland from 1980 to 2020, with ~~the~~ predictions for 2030.

# Overview:

## Practice: Book 13 test 2

The chart below shows the percentage of households in owned and rented accommodation in England and Wales between 1918 and 2011.

### Analysis notes:

- Decrease in rented
- Increase in owned
- Renter 1st in the beginning > overtaken

The bar chart illustrates what proportion of households were in owned and rented accommodation in England and Wales from 1918 to 2011.

1. Overall, although owned-rented accommodation ranked first initially, it was overtaken by rented-owned accommodation towards the end later on. The former significantly dropped during the period, while the latter saw a substantial decrease increase.
2. Overall, while the proportion of people renting-rented accommodation ranks ranked first in the beginning, it was overtaken by that of owning accommodation owned. The former experienced a significant decrease, whereas the latter increased significantly. :-
3. eOverall, although rented ranked first initially, it was overtaken by owned latter later on. †The former dropped significantly, while the latter increased substantially during the period.
4. Overall, although renting-rented accommodation ranked first initially, it fell and was overtaken towards the middle of the period by households owning, which rose at a similar rate towards the middle of the period. Which the latter generally rose.
5. Overall, although owned-rented accommodation ranked first in the beginning, it was outstripped by rented-owned. The former significantly dropped, while the latter increased at a similar rate.
6. Overall, home ownership increased steadily, while renting declined at a similar rate. aAlthough renters-the latter formed the largest group at the beginning, ownership-the former gradually rose and overtook renting-it by early 1970s later on.

7. Overall, although rented accommodations ranked first initially, it was overtaken by owned accommodations later on. ~~Households in rented accommodations~~ The former saw a significant decrease, while ~~owned accommodations~~ the latter increased at a similar rate.
8. Overall, ~~the shares of~~ owners decreased, whereas ~~those that~~ of tenants increased at a similar rate throughout the period. In the beginning, ~~renters the latter had the highest share ranked first~~, although they were outstripped by ~~owners the former in 1981~~ later on.

## Body:

The graph below shows the quantities of goods transported in the UK between 1974 and 2002 by four different modes of transport.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Write at least 150 words.

### Notes:

Road: 1st, initial fluc, increase gradually, after minimal decrease, reached a peak

or:

Road: 1st, initial fluc, rise despite fluc, peak

Pipeline: increase steadily > level off

### Examples of more detailed notes:

- Road: 1st throughout, 70m, fluc until 1982, increase gradually j.o.80m 1992, minimal decrease, peak at j.u.100m
- Pipeline: 5m, increase steadily > level off j.o.20 1995

### Example: Body paragraph 3

- The figure for pipeline stood at 5m in 1974 and increased steadily until 1995, when it levelled off at just over 20m.
- The figure for pipeline stood at 5m in 1974, increasing gradually until 1995, when it levelled off at just over 20m.
- Standing at 5m in 1974, the figure for pipeline rose gradually until 1995, when it levelled off at just over 20m
- Pipeline rose gradually from 5m in 1974 to just over 20m in 1995, after which it maintained this level for the rest of the period.

### Practice: Body Paragraph 1

1. Road stood first throughout the period, ~~with a fluctuation at he beginning standing~~ at 70 million (70m) tonnes ~~in the beginning and fluctuating~~ until 1982, ~~when after which it~~ gradually increased to just over 80m ~~until in~~ 1992. After a minimal decrease, it ~~reached rose to~~ just under 100m in 2002.
2. Road ranked first at 70 million (70m) tonnes, fluctuating until 1982, ~~after which~~ there was a gradual increase to ~~reach~~ just over 80m in 1992. Although it decreased minimally, it peaked at just under 100m at the end.
3. Road ~~initially~~ ranked first at 70 million (70m) tonnes ~~(70m) and,~~ fluctuating until 1982. It increased gradually ~~at to~~ just over 80m in 1992, while after a minimal decrease, ~~it~~ reached a peak at just under 100m ~~in 2002~~.

4. The figure for road transport stood first at 70 million (70m) tonnes ~~(mt)~~ in 1974, fluctuating until 1982, and then rising gradually to just over 80 ~~m-mt~~ in 1992. ~~, followed by~~ After a slight decline, ~~and peaking it peaked~~ at just over 100 ~~m-mtn~~ in 2002.
5. The figures for road stood first throughout the period, ~~in the beginning~~ starting at 70 million (70m) tonnes and ~~fluctuation~~ fluctuating until 1982. ~~It~~ increased gradually to just over 80m in 1992. ~~a~~ After a minimal decrease, it rose again and reached just under 100m in 2002.
6. The figure for road ranked first throughout the period, standing at 70 million (70m) tonnes in 1974. Despite some initial fluctuation ~~until 1982~~, it increased gradually from 1974 to just over 80m in 1992. After a minimal decrease, it peaked at just under 100m in 2002.
7. Road ~~had~~ ranked first throughout the period, ~~the figure stood~~ standing at 70 millions (70m) tonnes ~~(70m)~~ in 1974. It ~~had~~ fluctuated until 1982 ~~then before~~ gradually ~~increased~~ increasing to just over 80m in 1992. It ~~had showed~~ a slight decrease ~~after that, but~~ hit a peak of just ~~over~~ under 100m in 2002.
