

Access less affected by technological issues: Printed books/newspapers do not rely on technology or electricity > e.g. if a server loses its stored data or a country experiences a prolonged power cut > people can still read prints + nature of technology & electrical systems: problems/mistakes are always possible even in future > demand for them remains for many years

1. Finally, ~~although we live in modern technology,~~ access to printed material is less affected

Commented [ET1]: Not in your notes and makes no sense: you cannot LIVE IN TECHNOLOGY.

by technological issues. ~~Moreover, p~~Printed books and newspapers do not rely on technology

Commented [ET2]: You are not adding an idea here. This is the beginning of your development and no linker is used here.

and electricity. ~~Iran is a clear cut example that~~ For example, if a server loses ~~it is its~~ stored

Commented [ET3]: 1. Correct: *a clear example*
2. Not in your notes
3. You have made no link between what you say after this and IRAN.

data or a country experiences a prolonged power cut, people can still read prints. ~~Therefore,~~

Commented [ET4]: According to your notes, you are adding an idea here (a "+" is used to link the ideas), not referring to results.

~~this is the nature of technology and electrical systems whether people like it or not to read~~

~~printed materials.~~ ~~Obviously,~~ Moreover, it is in the nature of technology and electrical systems

Commented [ET5]: Not what your notes say

Commented [ET6]: See comment 17 on the previous body paragraph feedback

that problems and mistakes are always possible, even in the future. As a consequence, there

will be demand for printed newspapers and ~~printed~~ books accommodate demands for many

Commented [ET7]: Not what your notes tell you to write: This means به نیازها پاسخ خواهند داد, which is not the same *as demand for them remains* (تقاضا برایشان همچنان وجود خواهد داشت).

years.

Commented [ET8]: The main purpose of this exercise is learning to follow your notes and maintain the progression of ideas when writing. I have already explained extensively why it is not a good idea to change, add or remove ideas and change the order in which they are presented in the writing phase.

2. Finally, people ~~can still~~ will still be able to access ~~to printed~~ books and information even

when technological problems occur. ~~Printed books and newspapers~~ They do not depend on

electricity and technology ~~such as, internet or digital databases~~. ~~So, reading printed materials~~

~~is not affected by server failures, allowing people to continue reading~~. For instance, if a server

loses its stored data or a country experiences a prolonged power cut, people can still read

them. Moreover, ~~technological and electrical systems always face errors and failures~~ errors

and failures are in the nature of technological and electrical systems. ~~so~~ Therefore, there will

still be a demand for printed books and newspapers in the coming years.

Commented [ET9]: Do not change the ideas in your notes in the writing stage. Here, you are changing a case example into a couple of ideas.

Commented [ET10]: Not what your notes say: this is not exactly the same as saying this is “in their nature” and using that to draw future conclusions.

Commented [ET11]: The last sentence is the result of BOTH reasons, not just the one about errors and failures, so it must come in a new sentence.

Commented [ET12]: Your notes say “remain”.

Commented [ET13]: See comment 8

3. Finally, access to printed books or newspapers will be less affected by technological issues,

which are an inseparable part of the digital age. Fortunately, Reading newspapers and printed

books them does not rely on electricity; therefore, for example, when a server loses its data or

people face a prolonged power cut, they people can still read printed material them. Besides,

Due to the nature of technology and electrical systems, problems and mistakes will are

always likely to occur, even in the future. eConsequently, the demand for printed content will

always remain in the market for several years in the future.

Commented [ET14]: Do not add ideas in the writing phase. See comment 8.

Commented [ET15]: This makes no sense because we are not talking about saving a situation or being lucky.

Commented [ET16]: No reference

Commented [ET17]: According to your notes, you are adding an idea here (a “+” is used to link the ideas), so it needs to be linked properly.

Commented [ET18]: See comment 11

Commented [ET19]: Either it is ALWAYS or SEVERAL YEARS IN THE FUTURE.

4. Finally, printed books and newspapers are less affected by technological problems. because

Commented [ET20]: You have two reasons after this, not one, so you cannot just link one of them to the main idea.

They do not depend on electricity, internet connections or digital devices. For example, if a

server crashes and its stored data is lost, or if a country experiences a prolonged power cut,

people can still access and read printed materials. Since Besides, technological and electrical

Commented [ET21]: Better: *them*

Commented [ET22]: See comment 11

Commented [ET23]: See comment 17

systems are never completely reliable. Therefore, printed media may would probably

Commented [ET24]: See comment 10

Commented [ET25]: This is a weak modal, whereas, according to your opinion, you must draw a strong conclusion about the future.

continue to remain useful and in demand for many years.

5. In addition, printed books and newspapers are less affected by technological problems.

Unlike digital content, ~~printed materials~~ they do not require electricity or an internet

connection. For example, if in the future a server loses its stored data or a country

experiences a prolonged power cut, people will still be able to read printed books and

newspapers. Moreover, because of the nature of technology , technological and electrical

systems would ~~enforce experience~~ technical issues or unexpected failures , even in the future.

Therefore, demand for printed books and newspaper will ~~be~~ remain for many years.

Commented [ET26]: Better: *them*
