Brainstorming (Incomplete)

In the future, nobody will buy printed newspapers or books because they will be able to read everything they want online without paying. To what extent do you agree or disagree with this statement?

Agree

1. Publishers make money via advertising: We are embracing a modern world where everything is turning online for convenience: many activities done online increasingly e.g. shopping on amazon > more and more ads online > future: income from ads more than book/newspaper sales > publishers switch to ad money > need more viewers to get more ads > publish everything online for free to attract them

2. It will save environment: now, environmental problems growing e.g. air pollution, climate change > future: so bad, everyone gets worried > try to save environment > try to stop tree cutting > use less paper > stop buying prints

Introduction

Paraphrasing the task + Clear Opinion + hint to your first reason

It is said that/Some people believe that... + I strongly/generally believe/agree/disagree...
+ mainly for ...reasons/due to...issues/factors/...

Example: Cambridge IELTS 10, test 3

Countries are becoming more and more similar because people are able to buy the same products anywhere in the world.

Do you think this is a positive or negative development?

It is said that countries are becoming similar to each other because of the global spread of the same products, which are now available for purchase almost anywhere. I strongly believe that this modern development is largely detrimental to culture and traditions worldwide.
