

In the future, nobody will buy printed newspapers or books because they will be able to read everything they want online without paying.
To what extent do you agree or disagree with this statement?

1. It is said that all people in the future will be access-able to read everything which they want online for free, so nobody will buy printed newspapers or books in the future. I strongly agree with it with this, mainly because of all people will be concern about environment financial factors.

2. It is said that in the future, people will no longer purchase paper-based newspapers or books, as they will be able to access all desired the content they desire on the internet free of charge. I strongly agree with this prediction, mainly due to financial factors affecting publishers.

3. It is said that in the future, no one will purchase printed books or newspapers because they will be able to read everything online for free. I strongly agree with this view mainly for the change in the publishers' revenue streams financial reasons.

Commented [ET1]: 1. Correct: **future**
2. This is the adverb of time for the first clause, too, so it should come there to avoid confusion.

Commented [ET2]: You are referring to the whole sentence, not a singular noun, pronoun or phrase.

Commented [ET3]: 1. Correct: **will be concerned**
2. BECAUSE OF is followed with a noun/phrase. To use a clause, you must use BECAUSE.
3. I asked you to **hint** towards your **first** main idea, not present the **second** one **in full**.

Commented [ET4]: You are going to say almost the exact same thing in the next sentence (the first sentence of the next paragraph) and this will become repetitive. That is why I asked you to **hint** towards your first main idea, not present it in full.

4. It is said that in the future, nobody will purchase printed newspapers and books because they will be able to read everything they want online and free of charge. I strongly agree with

~~they want to read~~ through ~~online pages~~ ~~the internet~~, ~~the people's~~ tendency for

Commented [ET11]: The internet is not limited to the pages of websites. There are, for example, apps.

Commented [ET12]: You need this so that THEY in the previous clause has a reference.

Commented [ET17]: 1. Correct: *the environment*
2. Environmental issues are in your second main idea, not the first one.
