

Environmental protection: now: more education on environmental issues e.g. deforestation > future: everyone aware and concerned > try to reduce: paper made from trees > less paper used > less trees cut > people stop buying

1. The second reason ~~for support my opinion~~ is that people will support environmental protection. Nowadays, there is more education ~~is studying on regarding~~ environmental issues, such as deforestation. In the future, everyone will be aware and concerned about ~~it~~them, so they will try to reduce ~~using paper which made from trees, as a result less paper will used by individuals and less trees will cut down. Finally, them. As paper is made from trees, using less paper mean fewer trees are cut, so~~ people will stop buying paper book and newspapers.

Commented [ET1]: 1. Correct: *for my opinion*
2. Redundant and formulaic

Commented [ET2]: THAT is followed with a clause, not a phrase.

Commented [ET3]: The reference is environmental issues.

2. In addition, people will try to contribute to the protection of the environment. Nowadays educational content regarding environmental issues, such as deforestation, is increasing on social media. In the future, everyone will become more concerned and will try to reduce such issues. Since trees are the main resource for producing paper, less usage of paper results in less-fewer trees felled. Therefore, people will stop buying printed books and newspapers.

Commented [ET4]: Structure: *the...of...*

Commented [ET5]: Not in your notes

Commented [ET6]: Better: *reduced usage*

3. In addition, people will try to protect the environment. ~~Nowadays~~ people's awareness about ~~protecting the environment~~ increased environmental issues, such as deforestation, is increasing. ~~due to wide spread of social media for example these days each environmental issue will be viral among social media platforms and it will help individuals to be aware of these problems. for instance deforestation is one the most important factors that hoped to be controlled by increasing the awareness of people, As we know each year for producing paper based products many trees cut off, from my perspective~~ In the future, more and more people all people will be concerned about these issues, so they will try to reduce them. As paper is made from trees, ~~therefore people prefer to reduce using paper based products that will resulted~~ they will prefer to reduce their use of paper-based products, which will result in a dramatic decrease in ~~cutting off the trees~~ trees being cut off. and ~~Therefore, people they~~ will stop buying paper books and ~~news papers~~ newspapers. ~~to protect the environment.~~

Commented [ET7]: You must begin by presenting the main idea.

Commented [ET8]: The main purpose of this exercise is learning to follow your notes and maintain the progression of ideas when writing. I have already explained extensively why it is not a good idea to change, add or remove ideas and change the order in which they are presented in the writing phase.

Commented [ET9]: You have already said this.

4. In addition, protecting the environment will be increasingly important to people. These days more and more people are being educated about environmental issues, such as deforestation, so in the future, everyone will be aware and concerned about them. ~~They will reduce their purchase of books and newspapers made from paper which is made from trees, and will try to reduce them.~~ Paper is made from trees, ~~This which~~ means that, ~~if~~ the usage of paper ~~will~~ decreases, ~~and~~ fewer trees will be cut, ~~as~~ As a result, ~~of which~~ everyone will avoid buying printed books and newspapers.

Commented [ET10]: This is the conclusion you want to reach at the end of this paragraph. See your notes. Your notes say "try to reduce", which refers to the issues in the previous part. Also note that you are proving that people will STOP buying printed books and newspapers, not buy less.

5. ~~In addition, Environmental trend~~ protection is a future trend ~~will become a trend in the future.~~ Nowadays ~~becuse~~ because of the increasing ~~eduction~~ education about environmental ~~issyes~~ issues such as ~~deforestation~~ deforestation, ~~the awareness of~~ people's awareness is growing. ~~Consequently people will try to reduce the usage of papers~~ In the future, everyone will be aware and concerned about those issues, so they will try to reduce them. ~~Since paper consuming decreased, fewer trees will get cut, leading the rate purchase to decline.~~ Paper is made from trees, so if its consumption decreases, fewer trees will be cut. As a result, people will stop buying paper books and newspapers.

Commented [ET11]: 1. You have missed the part about everyone being concerned. 2. Your notes say "try to reduce", which refers to the issues in the previous part. You will reach this conclusion later in the paragraph.

Commented [ET12]: You have missed this part:
paper made from trees > less paper used > less trees cut
