

1. In terms of annual passenger numbers, Tokyo is by far the busiest system, carrying 1,927 million passengers, followed by Paris and London, with 1,191 million and 775 million, respectively. By contrast, the figure for Washington DC is considerably lower, at 144 million, while Los Angeles and Kyoto have the lowest figures, at just 50 million and 45 million, respectively.

Commented [ET1]: The third rank isn't really important.

Commented [ET2]: You could also report that the last two figures are approximately 1/3 as high as DC. See the last sentence in number 3.

2. In terms of passengers per year, there is a wide disparity between Tokyo and Paris on the one hand, and the remaining cities on the other. Tokyo ranks first at 1927 million passengers, while Paris has approximately half as many passengers, at 1191 million. Kyoto is marginally lower than Los Angeles, at 45 and 50 million respectively, ranking last.

Commented [ET3]: Repetitive

Commented [ET4]: See comment 2

3. Tokyo ranks first in terms of passengers per year at 1927 millions, followed by Paris in second place with 1191 million. The figure for London is 775 million, which is significantly greater than Washington DC at 144 million. Los Angeles and Kyoto are similar and approximately 1/3 as high as Washington DC (50 million and 45 million, respectively), with the latter ranking last.

Commented [ET5]: We do not use the plural form here:
200: 2 hundred
2000: 2 thousand
2000000: 2 million

Commented [ET6]: MILLION is a part of the figure you are reporting and must always be written. Without it, the figure is wrong and TA drops to 6.

4. In terms of the annual number of passengers, there is a significant difference between Tokyo on the one hand, and the other cities on the other, with the former ranking as it ranks first at 1927 million. Kyoto is almost as high as Los Angeles at 45 and 50 million respectively, ranking last.

Commented [ET7]: You don't have two ANDs, so this is not needed.

Commented [ET8]: There is only Tokyo in the previous part.

Commented [ET9]: You can report more features here, e.g. second rank. Also see comment 2.

5. ~~With the regard of~~ With regard to annual travellers, there is a significant ~~diffrence~~ difference

between Tokyo and Paris on the one hand ~~at 1927 and 1191 respectively, as the former~~

~~ranking first,~~ and ~~the remainig~~ remaining cities on the other, ~~as the former ranks first at 1927~~

~~million. the former followed by Londen wich is twice as number of passengers as Washington~~

London has more than five times as many passengers as DC at 775 million and 144 million

respectively. ~~the number of people using Kyoto underground railway~~ The figure for Kyoto is

almost ~~as the~~ same as LA at 50 million and 45 million ~~respectiver~~ respectively, ranking last ~~as~~

~~long as Kyoto, ranking last.~~

Commented [ET10]: 1. When did we ever report figures in the middle of structure A?
2. See comment 6

Commented [ET11]: 1. 775/144 is approximately 5.4.
2. Checking the structures when writing the paragraph is not difficult. For the love of the Spyderco Tenacious Tanto, do it to avoid mangled sentences like this.

Commented [ET12]: There is a lot of repetition here. use referencing and substitution e.g. *the figure for*.
