Brainstorming (Incomplete)

In the future, nobody will buy printed newspapers or books because they will be able to read everything they want online without paying. To what extent do you agree or disagree with this statement?

Agree

Publisher change the way they make money: Now: world moves toward digital technology > people moving in that direction in most categories including reading => future: people unwilling to pay for prints > publishers switch to online publishing > difficult to force copyright and stop sharing > easier to make money from advertising than sales on the internet > publish everything online for free to get more viewers, more ads

Protect the Environment: now: environmental problems e.g. air pollution, global warming getting worse > people gaining information > future: everyone aware and concerned > try to reduce deforestation > fewer trees cut > reduce need for paper > stop buying prints

Convenience

More convenient: easy to carry everywhere -> no need to carry a bag or heavy printed books -> read anywhere and anytime due to access to a phone

You can have access to many books and newspaper in your phone> have no weight

No need to go outside

Variety: Access to a wide range of topics- Read about different subjects online

Modern lifestyle > People wont have enough time for going shopping them > Access for every one with fingerprint.

it is easy to find

dont waste their time in traffic(save energy and time)

now/ everyone has a digital gadget & getting accoustomed using it / spending time surfing on net&social media online> news already available > in the future, tech will improve > become easier for them to follow news online

Using a read online helps us to save our time and money

Introduction

Paraphrasing the task + Clear Opinion + hint to your first reason

It is said that/Some people believe that… + I strongly/generally believe/agree/disagree… + mainly for …reasons/due to…issues/factors/…

Example: Cambridge IELTS 10, test 3

> ***Countries are becoming more and more similar because people are able to buy the same products anywhere in the world.***
>
> ***Do you think this is a positive or negative development?***

It is said that countries are becoming similar to each other because of the global spread of the same products, which are now available for purchase almost anywhere. I strongly believe that this modern development is largely detrimental to culture and traditions worldwide.
