CA: lack of reliability of online data in online platforms
Refute/Solution: technological progress > resolved in future

1. Some may argue that online content suffers from ~~problems such as~~ unreliability, but I think technological progress will address this issue in the near future.

2. Some people might argue that ~~they are facing with~~ there is a lack of reliability ~~of~~ in ~~onlin's~~ online platforms' data~~s~~, but ~~in my precpective~~ I think technological progress will solve it ~~by using some techniques~~ in the future.

3. ~~s~~Some may argue that the lack of reliability of ~~online~~ the data in online platforms ~~prevents~~ will prevent reading online, but I think it would be resolved in the future because of technological progress.

4. Some may argue that online data on digital platforms will lack reliability, but I believe this problem will be resolved through technological progress.✓

5. Some may argue that, because of the lack of reliability of online platforms, people ~~still~~ will still use printed materials, but I believe that the advancement of technology in the future will resolve this problem.

6. Some may argue that the lack of reliability ~~to access~~ in online data ~~is one of the main problems of trusting to read online~~ will stop people from using it, but I think with the advancement of technology, this issue would be resolved in the future.

7. Some may argue that~~, lacking of security~~ the lack of reliability in online platform~~s~~e will result in ~~distrstion~~ people avoiding them, but ~~i~~ I think technological progress will solve this problem in the futu~~t~~re.

8. Some may argue that online platforms suffer from a lack of reliability, but I think technological progress will resolve~~d~~ this issue in the future.

9. Some may argue that the lack of reliability of ~~online~~ the data in online platforms would make people hesitate to read online, but I think technological progress will resolve this issue ~~by applying authenticity verification, for example~~.

Commented [ET1]: Better: ***lacks reliability***
BEST: ***is often unreliable***
