

CA: read online for convenience

Refute/Solution: not as important as reliability and health

Some may argue that people will read newspapers and books online because of ~~the convience~~ convenience, but I think it will not be as important as reliability and health to them.

Task:

In the future, nobody will buy printed newspapers or books because they will be able to read everything they want online without paying. To what extent do you agree or disagree with this statement?

Introduction:

It is said that, as people will be able to access online resources to read any content they want for free, they will stop buying printed newspapers or books in the future. I strongly disagree with this prediction mainly due to legal concerns.

Main ideas:

- There will be strict rules about copyright
- People mistrust the contents on the internet
- Paying for printed books and newspapers will be worth it when it comes to health

In conclusion, I disagree that ~~no one~~ no one will spend money for printed newspapers and books in the future because they will not be able to read everything on the internet for free. ~~Because it~~ It will be illegal u to share content without its ~~author's~~ author's permission ~~in the future and' also~~, and people will not trust what ~~will is~~ is shared d online anymore.
